Professional Summary

Full-Stack Developer with 2+ years of experience building scalable web applications on the MERN stack (MongoDB, Express.js, React.js, Node.js), with strong REST API design and SQL/NoSQL database schema skills. Comfortable working in Linux environments and quick to pick up additional component-based JS frameworks such as Vue.js, given a solid foundation in React's reactive, component-driven architecture. Backed by a Computer Science degree with coursework in C/C++ fundamentals, Data Structures & Algorithms, and hands-on Python development. Delivered 50+ end-to-end client applications with strong client communication and problem-solving across the full SDLC. Russian Open Doors Olympiad Scholar.

Technical Skills

MERN Stack: MongoDB (schema design, aggregation), Express.js, React.js, Node.js

Frontend: React.js, HTML5, CSS3, JavaScript (ES6+), Tailwind CSS, Bootstrap

Backend: Node.js, Express.js, Python (Flask), REST API Design, JWT Authentication, OOP, Data Structures & Algorithms

Databases: MongoDB, MySQL (schema design, query optimization), SQLite, Firebase Firestore

Linux & Systems: Linux CLI, shell basics, server environment familiarity, Git/GitHub version control

Languages: JavaScript, Python, C, C++, Java, SQL

Tools & Practices: Git, GitHub, Docker, Postman, VS Code, Agile/SDLC

Soft Skills: Problem-solving, client communication, requirement gathering – developed through 50+ direct client engagements

Experience

TEYZIX CORE | **Full-Stack Developer Intern (Remote)** June 2026 – Present

- Built and deployed a scalable multi-vendor marketplace and vendor quotation management platform using the MERN stack with JWT authentication and role-based access control.
- Designed RESTful APIs and MongoDB schemas for vendor onboarding, product/quotation management, and admin dashboards.

Freelance Full-Stack Developer | **Fiverr Level 2 Seller (5-Star Rated)** Aug 2022 – Present

- Delivered 50+ end-to-end scalable web applications using React.js, Node.js, Express.js, Python (Flask), and REST APIs, owning the full cycle from requirement analysis through development, testing, and deployment.
- Collaborated directly with clients on scoping and architecture decisions, solving complex technical challenges in fast-paced, remote-first workflows – maintaining a 5-star satisfaction record across 3+ years.

Websera Solutions PK | **Mobile App Development Intern (Remote)** May 2026

- Contributing to cross-platform app development and codebase modernization with clean, component-based architecture practices.

Projects

Multi-Vendor Marketplace | React.js, Node.js, Express.js, MongoDB, JWT | June 2026

- Built a full-stack, scalable marketplace with JWT authentication, vendor dashboards, product management, and role-based access control, deployed live on Render.

Vendor Quotation Management System | React.js, Node.js, Express.js, MongoDB | June 2026

- Developed an RFQ and quotation management system with vendor/admin dashboards, JWT-based role authorization, and advanced search and filtering.

GymForge | HTML5, CSS3, JavaScript, Node.js, Express.js, SQLite, JWT | Fiverr Client Project

- Developed a gym management platform with service booking, JWT-secured admin panel, and role-based access; optimized asset pipeline for 40% faster page loads.

AI-Powered Inclusive Learning Assistant | Python, Flask, Hugging Face Transformers, Whisper API | Final Year Project

- Built an AI-powered accessibility platform with a Flask backend and REST API integrations for speech-to-text, summarization, translation, and text-to-speech processing.

Education

Sukkur IBA University | Bachelor of Science in Computer Science | Sukkur, Pakistan | May 2026

Certifications & Leadership

- Russian Open Doors Olympiad Winner — M.Sc. Computer Science & Data Science Scholarship, NUST MISIS Moscow (2024)
- Certifications: Google AI Essentials (2024), Web Development (Coursera), Data Science & Cybersecurity (Sukkur IBA University)
- Robotics Club Executive (2023 – Present), TechFest Volunteer Organizer (2023 – Present)
